

**FlameIT FITCool10 Immersion Cooling Liquid**

Creation date: 15th January 2023

Revision date: 15th January 2023

Version 1.0

---

**SECTION 1:****Identification of the substance/mixture and of the company/undertaking****1.1 Product identifier**

- **Trade name** FlameIT FITCool10 Immersion Cooling Liquid
- **Substance / Mixture** Mixture

**1.2 Relevant identified uses of the substance or mixture and uses advised against****Use of the Substance / Mixture**

- Insulating oil

**Uses advised against**

- This product must not be used in applications other than those listed in Section 1 without first seeking the advice of the supplier.

**1.3 Details of the supplier of the safety data sheet****Manufacturer/Supplier**

Outsourcing IT - Konopnickiej.Com  
Paweł Wojciechowski  
ul. Surowieckiego 10  
62-200 Gniezno, Poland

**VAT:** PL7811753151  
**Phone:** +48509919755  
**Email:** [biuro@flameit.io](mailto:biuro@flameit.io)  
**Website:** <https://flameit.io>

**Competent person responsible for the safety data sheet**

**Name:** Paweł Wojciechowski  
**Email:** [biuro@flameit.io](mailto:biuro@flameit.io)

## FlameIT FITCool10 Immersion Cooling Liquid

Creation date: 15th January 2023

Revision date: 15th January 2023

Version 1.0

### SECTION 2:

#### Hazards identification

##### 2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)

Aspiration hazard, Category 1

- **H304** May be fatal if swallowed and enters air-ways.

##### 2.2 Label elements

Labelling (REGULATION (EC) No 1272/2008)

Hazard pictograms

Signal word

- **Danger**

Hazard statements

###### Physical hazards

- Not classified as a physical hazard according to CLP criteria.

###### Health hazards

- **H304** May be fatal if swallowed and enters airways.

###### Environmental hazards

- Not classified as an environmental hazard according to CLP criteria.

Precautionary statements

###### Prevention

- No precautionary phrases.

**FlameIT FITCool10 Immersion Cooling Liquid**

Creation date: 15th January 2023

Revision date: 15th January 2023

Version 1.0

**Response**

- **P331** Do NOT induce vomiting.
- **P301 + P310** **IF SWALLOWED:** Immediately call a POISON CENTER/ doctor.

**Storage**

- **P405** Store locked up.

**Disposal**

- **P501** Dispose of contents/ container to an approved waste disposal plant.

**2.3 Other hazards**

- This mixture does not contain any REACH registered substances that are assessed to be a PBT or a vPvB.
- Ecological information: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.
- Toxicological information: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.
- Used oil may contain harmful impurities.
- Not classified as flammable but will burn.

**SECTION 3:****Composition/information on ingredients****3.2 Mixtures****Chemical nature** Synthetic base oil and additives.**Components**

Chemical name	CAS-No. EC-No. Index-No. Registration number	Classification	Concentration (% w/w)
Distillates (Fischer-Tropsch), heavy, C18-50- branched and linear	1262661-88-0	Asp. Tox. 1; H304	99-100

**FlameIT FITCool10 Immersion Cooling Liquid**

Creation date: 15th January 2023

Revision date: 15th January 2023

Version 1.0

---

For explanation of abbreviations see section 16.

**SECTION 4:****First aid measures****4.1 Description of first aid measures****Protection of first-aiders**

- When administering first aid, ensure that you are wearing the appropriate personal protective equipment according to the incident, injury and surroundings.

**If inhaled**

- No treatment necessary under normal conditions of use.
- If symptoms persist, obtain medical advice.

**In case of skin contact**

- Remove contaminated clothing.
- Flush exposed area with water and follow by washing with soap if available.
- If persistent irritation occurs, obtain medical attention.

**In case of eye contact**

- Flush eye with copious quantities of water. Remove contact lenses, if present and easy to do. Continue rinsing.
- If persistent irritation occurs, obtain medical attention.

**If swallowed**

- **Call emergency number for your location / facility.**
- **If swallowed, do not induce vomiting:** transport to the nearest medical facility for additional treatment. If vomiting occurs spontaneously, keep head below hips to prevent aspiration. If any of the following delayed signs and symptoms appear within the next 6 hours, transport to the nearest medical facility: fever greater than 101° F (38.3°C), shortness of breath, chest congestion or continued coughing or wheezing.

**4.2 Most important symptoms and effects, both acute and delayed****Symptoms**

- If material enters lungs, signs and symptoms may include coughing, choking, wheezing, difficulty in breathing, chest congestion, shortness of breath, and/or fever.
- The onset of respiratory symptoms may be delayed for several hours after exposure.

**FlameIT FITCool10 Immersion Cooling Liquid**

Creation date: 15th January 2023

Revision date: 15th January 2023

Version 1.0

---

- Defatting dermatitis signs and symptoms may include a burning sensation and/or a dried/cracked appearance.
- Ingestion may result in nausea, vomiting and/or diarrhoea.

**4.3 Indication of any immediate medical attention and special treatment needed****Treatment**

- Potential for chemical pneumonitis. Call a doctor or poison control center for guidance.

**SECTION 5:****Firefighting measures****5.1 Extinguishing media****Suitable extinguishing media**

- Foam, water spray or fog.
- Dry chemical powder, carbon dioxide, sand or earth may be used for small fires only.

**Unsuitable extinguishing media**

- Do not use water in a jet.

**5.2 Special hazards arising from the substance or mixture****Specific hazards during firefighting**

Hazardous combustion products may include:

- A complex mixture of airborne solid and liquid particulates and gases (smoke).
- Carbon monoxide may be evolved if incomplete combustion occurs.
- Unidentified organic and inorganic compounds

**5.3 Advice for firefighters****Special protective equipment for firefighters**

- Proper protective equipment including chemical resistant gloves are to be worn; chemical resistant suit is indicated if large contact with spilled product is expected.
- Self-Contained Breathing Apparatus must be worn when approaching a fire in a confined space.
- Select fire fighter's clothing approved to relevant Standards (e.g. Europe: EN469).

## FlameIT FITCool10 Immersion Cooling Liquid

Creation date: 15th January 2023

Revision date: 15th January 2023

Version 1.0

---

### Specific extinguishing methods

- Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

## SECTION 6:

### Accidental release measures

#### 6.1 Personal precautions, protective equipment and emergency procedures

##### Personal precautions

- |                                    |                                   |
|------------------------------------|-----------------------------------|
| 6.1.1 For non emergency personnel: | Avoid contact with skin and eyes. |
| 6.1.2 For emergency responders:    | Avoid contact with skin and eyes  |

#### 6.2 Environmental precautions.

- Use appropriate containment to avoid environmental contamination.
- Prevent from spreading or entering drains, ditches or rivers by using sand, earth, or other appropriate barriers.

#### 6.3 Methods and material for containment and cleaning up

- Slippery when spilt.
- Avoid accidents, clean up immediately.
- Prevent from spreading by making a barrier with sand, earth or other containment material.
- Reclaim liquid directly or in an absorbent.
- Soak up residue with an absorbent such as clay, sand or other suitable material and dispose of properly.

#### 6.4 Reference to other sections

- For guidance on selection of personal protective equipment see Section 8 of this Safety Data Sheet.
- For guidance on disposal of spilled material see Section 13 of this Safety Data Sheet.

## SECTION 7:

### Handling and storage

#### 7.1 Precautions for safe handling

##### Technical measures

- Use local exhaust ventilation if there is risk of inhalation of vapours, mists or aerosols.

## FlameIT FITCool10 Immersion Cooling Liquid

Creation date: 15th January 2023

Revision date: 15th January 2023

Version 1.0

- Use the information in this data sheet as input to a risk assessment of local circumstances to help determine appropriate controls for safe handling, storage and disposal of this material.

### Advice on safe handling

- Avoid prolonged or repeated contact with skin.
- Avoid inhaling vapour and/or mists.
- When handling product in drums, safety footwear should be worn and proper handling equipment should be used.
- Properly dispose of any contaminated rags or cleaning materials in order to prevent fires.

### Product Transfer

- Proper grounding and bonding procedures should be used during all bulk transfer operations to avoid static accumulation.

## 7.2 Conditions for safe storage, including any incompatibilities

### Further information on storage stability

- Keep the container tightly closed and in a cool, well-ventilated place.
- Use properly labelled and closable containers.
- Store at ambient temperature.
- Refer to section 15 for any additional specific legislation covering the packaging and storage of this product.

### Packaging material

- **Suitable material:** For containers or container linings, use mild steel or high density polyethylene.
- **Unsuitable material:** PVC.

### Container Advice

- Polyethylene containers should not be exposed to high temperatures because of possible risk of distortion.

## 7.3 Specific end use(s)

### Specific use(s)

- Not applicable

## FlameIT FITCool10 Immersion Cooling Liquid

Creation date: 15th January 2023

Revision date: 15th January 2023

Version 1.0

---

### SECTION 8:

#### Exposure controls/personal protection

##### 8.1 Control parameters

##### Biological occupational exposure limits

##### 8.2 Exposure controls

###### Engineering measures

- The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances.
- Appropriate measures include:
  - Adequate ventilation to control airborne concentrations.
  - Where material is heated, sprayed or mist formed, there is greater potential for airborne concentrations to be generated.

###### General Information

- Define procedures for safe handling and maintenance of controls.
- Educate and train workers in the hazards and control measures relevant to normal activities associated with this product.
- Ensure appropriate selection, testing and maintenance of equipment used to control exposure, e.g. personal protective equipment, local exhaust ventilation.
- Drain down system prior to equipment break-in or maintenance.
- Retain drain downs in sealed storage pending disposal or subsequent recycle.
- Always observe good personal hygiene measures, such as washing hands after handling the material and before eating, drinking, and/or smoking.
- Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned.
- Practice good housekeeping.
- **Do not ingest. If swallowed, then seek immediate medical assistance**

###### Personal protective equipment

- The provided information is made in consideration of the PPE directive (Council Directive 89/686/EEC) and the CEN European Committee for Standardisation (CEN) standards.
- Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers.
- **Eye protection:**
  - If material is handled such that it could be splashed into eyes, protective eyewear is recommended. Approved to EU Standard EN166.
- **Hand protection:**

**FlameIT FITCool10 Immersion Cooling Liquid**

Creation date: 15th January 2023

Revision date: 15th January 2023

Version 1.0

- Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374, US: F739) made from the following materials may provide suitable chemical protection. PVC, neoprene or nitrile rubber gloves
- Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, dexterity. Always seek advice from glove suppliers.
- Contaminated gloves should be replaced.
- Personal hygiene is a key element of effective hand care.
- Gloves must only be worn on clean hands.
- After using gloves, hands should be washed and dried thoroughly.
- Application of a non-perfumed moisturizer is recommended.
- For continuous contact we recommend gloves with breakthrough time of more than 240 minutes with preference for > 480 minutes where suitable gloves can be identified.
- For short-term/splash protection we recommend the same but recognize that suitable gloves offering this level of protection may not be available and in this case a lower breakthrough time maybe acceptable so long as appropriate maintenance and replacement regimes are followed.
- Glove thickness is not a good predictor of glove resistance to a chemical as it is dependent on the exact composition of the glove material.
- Glove thickness should be typically greater than 0.35 mm depending on the glove make and model.
- **Skin and body protection:** Skin protection is not ordinarily required beyond standard work clothes. It is good practice to wear chemical resistant gloves.
- **Respiratory protection:**
  - No respiratory protection is ordinarily required under normal conditions of use.
  - In accordance with good industrial hygiene practices, precautions should be taken to avoid breathing of material. If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker health, select respiratory protection equipment suitable for the specific conditions of use and meeting relevant legislation.
  - Check with respiratory protective equipment suppliers.
  - Where air-filtering respirators are suitable, select an appropriate combination of mask and filter.
  - Select a filter suitable for combined particulate/organic gases and vapours [Type A/Type P boiling point > 65°C (149°F)] meeting EN14387 and EN143.

**SECTION 9:****Physical and chemical properties****9.1 Information on basic physical and chemical properties**

- |                         |                    |

| ● <b>Conductivity:</b>           | This material is not expected to be a static accumulator. |

## SECTION 10:

### Stability and reactivity

#### 10.1 Reactivity

- The product does not pose any further reactivity hazards in addition to those listed in the following sub-paragraph.

## FlameIT FITCool10 Immersion Cooling Liquid

Creation date: 15th January 2023

Revision date: 15th January 2023

Version 1.0

---

### 10.2 Chemical stability

- Stable.
- No hazardous reaction is expected when handled and stored according to provisions

### 10.3 Possibility of hazardous reactions

- Reacts with strong oxidising agents.

### 10.4 Conditions to avoid

- Extremes of temperature and direct sunlight.

### 10.5 Incompatible materials

- Strong oxidising agents.

### 10.6 Hazardous decomposition products

- No decomposition if stored and applied as directed.

## SECTION 11:

### Toxicological information

#### 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

- **Information on likely routes of exposure.** Skin and eye contact are the primary routes of exposure although exposure may occur following accidental ingestion.

#### Acute toxicity

##### Product

- **Acute oral toxicity**
  - **LD50 (rat):** > 5.000 mg/kg
  - **Remarks:** Low toxicity. Based on available data, the classification criteria are not met.
- **Acute inhalation toxicity**
  - **Remarks:** Based on available data, the classification criteria are not met.
- **Acute dermal toxicity**
  - **LD50 (Rabbit):** > 5.000 mg/kg
  - **Remarks:** Low toxicity. Based on available data, the classification criteria are not met.

**FlameIT FITCool10 Immersion Cooling Liquid**

Creation date: 15th January 2023

Revision date: 15th January 2023

Version 1.0

**Skin corrosion/irritation****Product**

- Not irritating to skin.
- Based on available data, the classification criteria are not met.

**Serious eye damage/eye irritation****Product**

- Slightly irritating to the eye.
- Based on available data, the classification criteria are not met.

**Respiratory or skin sensitisation****Product**

- For respiratory and skin sensitisation: Not a sensitiser.
- Based on available data, the classification criteria are not met.

**Germ cell mutagenicity****Product**

- **Genotoxicity in vivo**
  - Non mutagenic.
  - Based on available data, the classification criteria are not met.
- **Germ cell mutagenicity-Assessment**
  - This product does not meet the criteria for classification in categories 1A/1B.

**Carcinogenicity****Product**

- Not a carcinogen.
- Based on available data, the classification criteria are not met.
- This product does not meet the criteria for classification in categories 1A/1B.

Material	GHS/CLP Carcinogenicity Classification
Distillates (Fischer-Tropsch), C18-50, branched and linear	No carcinogenicity classification.

## FlameIT FITCool10 Immersion Cooling Liquid

Creation date: 15th January 2023

Revision date: 15th January 2023

Version 1.0

---

### Reproductive toxicity

#### Product

- Not a developmental toxicant.
- Does not impair fertility.
- Based on available data, the classification criteria are not met.
- This product does not meet the criteria for classification in categories 1A/1B.

### Toxicity for specific target organ - single exposure

#### Product

- Based on available data, the classification criteria are not met.

### Toxicity for specific target organ - repeated exposure

#### Product

- Based on available data, the classification criteria are not met.

### Aspiration toxicity

#### Product

- Aspiration into the lungs when swallowed or vomited may cause chemical pneumonitis which can be fatal.

## 11.2 Information on other hazards

### Endocrine disrupting properties

#### Product

- The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher..

### Further information

#### Product

- Used oils may contain harmful impurities that have accumulated during use. The concentration of such impurities will depend on use and they may present risks to health and the environment on disposal.
- ALL used oil should be handled with caution and skin contact avoided as far as possible.
- Slightly irritating to the respiratory system.

## FlameIT FITCool10 Immersion Cooling Liquid

Creation date: 15th January 2023

Revision date: 15th January 2023

Version 1.0

- Classifications by other authorities under varying regulatory frameworks may exist.
- Unless indicated otherwise, the data presented is representative of the product as a whole, rather than for individual component(s).

## SECTION 12: Ecological information

### 12.1 Toxicity

#### Product

- **Toxicity to fish**
  - LL/EL/IL50 > 100 mg/l
  - Practically non toxic
  - Based on available data, the classification criteria are not met.
- **Toxicity to daphnia and other aquatic invertebrates**
  - LL/EL/IL50 > 100 mg/l
  - Practically non toxic
  - Based on available data, the classification criteria are not met.
- **Toxicity to algae/aquatic plants**
  - LL/EL/IL50 > 100 mg/l
  - Practically non toxic
  - Based on available data, the classification criteria are not met.
- **Toxicity to fish (Chronic toxicity)**
  - Based on available data, the classification criteria are not met.
- **Toxicity to daphnia and other aquatic invertebrates (Chronic toxicity)**
  - Based on available data, the classification criteria are not met.
- **Toxicity to microorganisms**
  - Based on available data, the classification criteria are not met.

### 12.2 Persistence and degradability

#### Product

- **Biodegradability**
  - Inherently biodegradable.

### 12.3 Bioaccumulative potential

#### Product

- **Bioaccumulation**
  - Does not bioaccumulate significantly.

**FlameIT FITCool10 Immersion Cooling Liquid**

Creation date: 15th January 2023

Revision date: 15th January 2023

Version 1.0

---

**12.4 Mobility in soil****Product****• Mobility**

- Liquid under most environmental conditions., If it enters soil, it will adsorb to soil particles and will not be mobile.
- Floats on water

**12.5 Results of PBT and vPvB assessment****Product****• Assessment**

- This mixture does not contain any REACH registered substances that are assessed to be a PBT or a vPvB.

**12.6 Endocrine disrupting properties**

- The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

**12.7 Other adverse effects****Product****• Additional ecological information**

- Does not have ozone depletion potential, photochemical ozone creation potential or global warming potential.
- Product is a mixture of non-volatile components, which will not be released to air in any significant quantities under normal conditions of use.
- Films formed on water may affect oxygen transfer and damage organisms.
- Causes physical fouling of aquatic organisms.
- Mineral oil does not cause chronic toxicity to aquatic organisms at concentrations less than 1 mg/l.
- Unless indicated otherwise, the data presented is representative of the product as a whole, rather than for individual component(s).

**SECTION 13:****Disposal considerations****13.1 Waste treatment methods****Product**

- Recover or recycle if possible.
- It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste classification and disposal methods in compliance with applicable regulations.
- Do not dispose into the environment, in drains or in water courses.
- Waste product should not be allowed to contaminate soil or ground water, or be disposed of into the environment.
- Waste, spills or used product is dangerous waste.
- Waste arising from a spillage or tank cleaning should be disposed of in accordance with prevailing regulations, preferably to a recognised collector or contractor. The competence of the collector or contractor should be established beforehand.
- Do not dispose of tank water bottoms by allowing them to drain into the ground. This will result in soil and groundwater contamination.
- MARPOL - see International Convention for the Prevention of Pollution from Ships (MARPOL 73/78) which provides technical aspects at controlling pollutions from ships.

**Contaminated packaging**

- Dispose in accordance with prevailing regulations, preferably to a recognized collector or contractor. The competence of the collector or contractor should be established beforehand.
- Disposal should be in accordance with applicable regional, national, and local laws and regulations.

**Local legislation / Waste management legislation****Waste catalogue**

- EU Waste Disposal Code (EWC)

**Waste type code**

- 05 01 99\*

**Remarks**

- Disposal should be in accordance with applicable regional, national, and local laws and regulations.
- Classification of waste is always the responsibility of the end user.

### SECTION 14:

#### Transport information

##### 14.1 UN number or ID number

- Not subject to transport regulations

##### 14.2 UN proper shipping name

- Not relevant

##### 14.3. Transport hazard class(es)

- Not relevant

##### 14.4. Packing group

- Not relevant

##### 14.5. Environmental hazards

- Not relevant

##### 14.6. Special precautions for user

- **Special Precautions:** Refer to Section 7, Handling & Storage, for special precautions which a user needs to be aware of or needs to comply with in connection with transport.

##### 14.7 Maritime transport in bulk according to IMO instruments

- MARPOL Annex 1 rules apply for bulk shipments by sea.

### SECTION 15:

#### Regulatory information

##### 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

- **REACH - List of substances subject to authorisation (Annex XIV)**
  - Product is not subject to Authorisation under REACH.
- **Volatile organic compounds**
  - Volatile organic compounds (VOC) content: 0 %

**FlameIT FITCool10 Immersion Cooling Liquid**

Creation date: 15th January 2023

Revision date: 15th January 2023

Version 1.0

**Other regulations**

The regulatory information is not intended to be comprehensive. Other regulations may apply to this material.

- Act of 25 February 2011 on chemical substances and their mixtures (Dz.U. 2011 nr 63 poz. 322).
- Ordinance of the Minister of Health of 12 January 2015 concerning the criteria and procedures for classification of chemical substances and their mixtures (Dz.U. 2015 poz. 208).
- Regulation of the Minister of Labor and Social Policy of 6th June 2014 concerning the highest allowable concentrations and levels of agents harmful for health in the workplace (Dz.U. 2018 poz. 1286).
- Regulations of the Minister of Economy, Labor and Social Policy of 21 December 2005 concerning the basic requirements for personal protective equipment (Dz.U. 2005 nr 259 poz. 2173).
- Ordinance of the Minister of Health of 9 September 2016 on the health and safety of workers related to chemical agents at work (Dz.U. 2016 poz. 1488).
- Regulation of the Minister of Health of 2nd February 2011 concerning tests and measurement of agents harmful for health in the workplace (Dz.U. 2011 nr 33 poz 166).
- Regulation of the Minister of Health of 20 April 2012 on the labelling of packaging of dangerous substances and mixtures of dangerous substances and mixtures (Dz.U. 2011 nr 33 poz. 166).
- Act of 14 December 2012 on Waste (Dz.U. 2013 poz. 21).
- Act of 13 June 2013 on packaging and packaging waste (Dz.U. 2013 poz. 888).
- Regulation of the Minister of Environment of 9 December 2014 on the Waste Catalog (Dz.U. 2014 poz. 1923).
- Act of 19 August 2011 on the carriage of dangerous goods (Dz.U. 2011 nr 227 poz. 1367).

**The components of this product are reported in the following inventories**

- **REACH** All components listed or polymer exempt.
- **TSCA** All components listed.

**15.2 Chemical safety assessment**

- No Chemical Safety Assessment has been carried out for this substance/mixture by the supplier.

**SECTION 16:****Other information****Full text of H-Statements**

- **EUH066** Repeated exposure may cause skin dryness or cracking.
- **H304** May be fatal if swallowed and enters airways.
- **H400** Very toxic to aquatic life.
- **H410** Very toxic to aquatic life with long lasting effects.

**Full text of other abbreviations**

- **Aquatic Acute** - Short-term (acute) aquatic hazard
- **Aquatic Chronic** - Long-term (chronic) aquatic hazard
- **Asp. Tox.** - Aspiration hazard
- **ADN** - European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways;
- **ADR** - Agreement concerning the International Carriage of Dangerous Goods by Road
- **AIIC** - Australian Inventory of Industrial Chemicals
- **ASTM** - American Society for the Testing of Materials
- **bw** - Body weight
- **CLP** - Classification Labelling Packaging Regulation (EC) No 1272/2008
- **CMR** - Carcinogen, Mutagen or Reproductive Toxicant
- **DIN** - Standard of the German Institute for Standardisation
- **DSL** - Domestic Substances List (Canada)
- **ECHA** -European Chemicals Agency
- **EC-Number** - European Community number
- **EC<sub>x</sub>** - Concentration associated with x% response
- **EL<sub>x</sub>** - Loading rate associated with x% response
- **EmS** - Emergency Schedule
- **ENCS** - Existing and New Chemical Substances (Japan)
- **ErC<sub>x</sub>** - Concentration associated with x% growth rate response
- **GHS** - Globally Harmonized System
- **GLP** - Good Laboratory Practice
- **IARC** - International Agency for Research on Cancer
- **IATA** - International Air Transport Association
- **IBC** - International Code for the Construction and Equipment of Ships carrying Dangerous Chemicals in Bulk
- **IC<sub>50</sub>** - Half maximal inhibitory concentration
- **ICAO** - International Civil Aviation Organization
- **IECSC** - Inventory of Existing Chemical Substances in China
- **IMDG** - International Maritime Dangerous Goods
- **IMO** - International Maritime Organization
- **ISHL** - Industrial Safety and Health Law (Japan)
- **ISO** - International Organisation for Standardization
- **KECI** - Korea Existing Chemicals Inventory
- **LC<sub>50</sub>** - Lethal Concentration to 50 % of a test population
- **LD<sub>50</sub>** - Lethal Dose to 50% of a test population (Median Lethal Dose)
- **MARPOL** - International Convention for the Prevention of Pollution from Ships
- **n.o.s.** - Not Otherwise Specified
- **NO(A)EC** - No Observed (Adverse) Effect Concentration
- **NO(A)EL** - No Observed (Adverse) Effect Level
- **NOELR** - No Observable Effect Loading Rate
- **NZIoC** - New Zealand Inventory of Chemicals

- **OECD** - Organization for Economic Co-operation and Development
- **OPPTS** - Office of Chemical Safety and Pollution Prevention
- **PBT** - Persistent, Bioaccumulative and Toxic substance
- **PICCS** - Philippines Inventory of Chemicals and Chemical Substances
- **(Q)SAR** - (Quantitative) Structure Activity Relationship
- **REACH** - Regulation (EC) No 1907/2006 of the European Parliament and of the Council concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals
- **RID** - Regulations concerning the International Carriage of Dangerous Goods by Rail
- **SADT** - Self-Accelerating Decomposition Temperature
- **SDS** - Safety Data Sheet
- **SVHC** - Substance of Very High Concern
- **TCSI** - Taiwan Chemical Substance Inventory
- **TECI** - Thailand Existing Chemicals Inventory
- **TRGS** - Technical Rule for Hazardous Substances
- **TSCA** - Toxic Substances Control Act (United States)
- **UN** - United Nations
- **vPvB** - Very Persistent and Very Bioaccumulative

**Further information****Training guidelines**

- Inform the personnel about the recommended ways of use, mandatory protective equipment, first aid and prohibited ways of handling the product.

**Other information**

- No Exposure Scenario annex is attached to this safety data sheet. It is a non-classified mixture containing hazardous substances as detailed in Section 3; relevant information from Exposure Scenarios for the hazardous substances contained have been integrated into the core sections 1-16 of this SDS.
- A vertical bar (|) in the left margin indicates an amendment from the previous version.

**Information about data sources used to compile the Safety Data Sheet**

- REGULATION (EC) No. 1907/2006 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL (REACH) as amended. REGULATION (EC) No. 1272/2008 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL as amended. Data from the manufacturer of the substance / mixture, if available - information from registration dossiers.

Classification of the mixture	Classification procedure
Asp. Tox. 1. <b>H304</b>	Expert judgement and weight of evidence determination
